SUMMARY

Motivated Cybersecurity Intern with hands-on experience in implementing security measures to protect networks and data. Strong understanding of cryptography, risk assessment, vulnerability testing, and firewall management.

WORK EXPERIENCE

Cyber Security Mentorship Program

June - July 2024

- 1. Gained hands-on experience in cybersecurity tools and techniques.
 - 2. Developed strong analytical skills through real-world cybersecurity projects.
 - 3. Enhanced knowledge of best practices in cybersecurity defense strategies.
-

SKILL

- | | |
|--|-------------------------------------|
| • Network Security | • Threat & Vulnerability Management |
| • Administrative tasks | • Firewalls |
| • Cryptography | • Endpoint Security |
| • Information Security Risk Management | • Information Security Awareness |
| • Data loss prevention | • Penetration Testing |
-

EDUCATION

A Bachelor of Technology in Computer Science and Engineering DIT University

July 2021 - July 2025

Gained hands-on experience with cybersecurity tools and techniques through real-world projects.

PROJECT

Keylogger

- Developed a Python keylogger that captures and sends keystroke logs to a server.

Network Analysis Tools

- Created Network Analysis Tools to monitor, capture, and analyze traffic for real-time threat detection and performance optimization.

Window Batch Script CMD

- Coordinated project tasks, ensuring compliance with engineering standards and regulations.

Steganography

- Steganography conceals information within another medium, such as an image or audio, making the hidden data undetectable to unintended recipients.
-

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
- **Certifications:** [Batch Script Programming](#), [Fundamentals of Network Communication](#), [Cyber Ethics](#), [Password security](#), [Advent of Cyber 2022](#), [Digital Forensics](#)
